"SAFE TO PRACTICE"
AS THE STANDARD FOR LICENSURE

AN INDUSTRY OF MEDIOCRITY?

"There are 3.3 million public school teachers in America, and they probably can't all be trained by start-ups. Raising up the standards of our university programs should be an urgent priority. But one reason for the widespread mediocrity is that universities have had a cozy, lucrative monopoly. It's about time the leaders of our education schools *did* feel threatened."

Bill Keller, *New York Times*, October 20, 2013
http://www.nytimes.com/2013/10/21/opinion/keller-an-industry-of-mediocrity.html

WHAT IS THE PROBLEM? WHAT ARE THE SOLUTIONS? ALTERNATIVE VIEWS

PROBLEM	SOLUTION
1. Teacher candidates are weak and programs are too easy; university-based teacher education is inherently mediocre	1. Make teacher preparation tougher: encourage programs outside of universities, increase admissions selectivity, extend field experience; use stringent teacher evaluation to weed out bad teachers
2. The country views teaching as something one must learn from experience, and that good practice is personal	2. Create and agree on a common professional standard of initial performance for entry to beginning teaching

NO PROFESSIONALLY GROUNDED SYSTEM FOR TEACHERS' TRAINING

1. No common curriculum for the professional training of new or practicing teachers
2. A reliance on academic standards and preparation for content knowledge
3. Over 3,000 independent providers of initial teacher training, and a vast array of professional development providers
4. **No common standard of performance for entry to independent practice with (on) young people**

WHY IS THIS THE CASE? TWO BIG THREADS FROM OUR NATION'S HISTORY

- The development of the occupation of teaching in the U.S.: eased entry, cellular structure, and easy replacement
  - → Lack of shared codified professional knowledge, lack of shared standards for teaching quality
  - → Lack of investment in professional training
- The development of localism: cultural diversity, parental rights
  - → Democratic political authority and governance of schooling
  - → School management and unionization
  - → Highly varied and inequitable opportunities and outcomes for students

A widely shared view of teaching as individual and learned on the job

EDUCATION

THE CONSEQUENCES ARE SERIOUS FOR EDUCATIONAL EQUITY AND QUALITY

Could we change this? What would have to be done?

Solving this is a moral imperative.

EDUCATION

WHAT SHOULD INITIAL TRAINING AND LICENSURE DO?

1. Take as the central imperative the **rights of children**
2. Focus on preparing entry-level teachers who are ready to care for the **academic, social, emotional, and physical safety** of children, and to conform to standards of **ethical practice**
3. Provide assurance to parents and to the public that the beginning professional has met the standards necessary to be given **initial responsibility for students' learning**

In other words, ensure that the beginning teacher meets the standard of "safe to practice."

SELECTIVITY FOR ENTRY TO THE CLASSROOM: "SAFE TO PRACTICE" AS THE STANDARD

- Assess average performance to assure that the professional will be able to, on average, support students' learning and development
- Use "on-demand" assessments that do not depend on ideal students, circumstances, or environments
- Situate assessments in practice: what this means depends on the knowledge, content, or skill being assessed

CRUCIAL NEXT STEPS FOR THE PROFESSION

1. *Build on basic agreements about domains of teaching and evidence about content knowledge for teaching:* Identify **key practices of teaching** and **high-leverage content** essential for responsible beginning practice
2. *Build on commitment to clinical preparation:* Develop **specific approaches to training** beginners to carry out those practices, along a **continuum of contexts** for learning and practicing practice
3. *Build on commitment to performance assessment:* Develop **performance assessments of specific practices and content** and make them required for entry

HIGH-LEVERAGE PRACTICES

High-leverage practices (HLPs) are specific tasks of teaching that are fundamental to safe and skillful practice.

Based on work done at the University of Michigan School of Education in the redesign of our teacher education program, and at TeachingWorks, an organization housed at U-M whose mission it is to improve the quality of teaching and learning by transforming teachers' education.

EXAMPLES OF HIGH-LEVERAGE PRACTICES

- Leading a whole-class discussion
- Eliciting and interpreting individual students' thinking
- Explaining and modeling core content
- Formulating and posing questions
- Establishing norms and routines for classroom discourse and work that are central to the content
- Recognizing particular common patterns of student thinking and development in a subject-matter domain
- Setting up and managing small group work
- Selecting and using specific methods to check understanding and monitor student learning during and across lessons
- Composing, selecting, adapting quizzes, tests, and other methods of assessing student learning of a chunk of instruction
- Conducting a meeting about a student with a parent or guardian

BUILDING NEW ASSESSMENTS OF TEACHING PRACTICE

- Based on actual performance of specific high-leverage practices
- Tied to teaching specific academic content
- Conducted in a variety of settings for practice, depending on what is being assessed
- Built as part of an ongoing program of R&D

DOES THIS STUDENT UNDERSTAND?

$$\begin{array}{r} 9\frac{2}{10} \\ -\ 6\frac{7}{10} \\ \hline 2\frac{5}{10} \end{array}$$

POSSIBILITIES?

1. The student does understand the underlying concepts.
2. The student subtracted “up” and made a basic calculational error.
3. The student overgeneralized from base 10 whole number subtraction.

LEADING A WHOLE-CLASS DISCUSSION IN MATH

- A specified discussable math problem that is curriculum-independent
- Supports for setting up the task
- Goals for the discussion
- Rubric for assessing quality of the discussion

MAKING "SAFE TO PRACTICE" THE STANDARD FOR INITIAL LICENSURE

- Agree on common high-leverage practices and content knowledge, as well as ethics, necessary for safe and skillful practice
- Determine how these can be most validly assessed to assure probability of safe practice: on-demand, other (portfolio, etc.)
- Build common supports to help candidates develop the requisite skill and capabilities
- Carry out ongoing research and development to improve validity and precision of licensure system

EDUCATION

WHAT WOULD IT TAKE TO ESTABLISH A PROFESSIONAL SYSTEM FOR ENTRY TO TEACHING?

1. A common standard for the capabilities required, and a common tool for determining readiness for practice
2. Resources for the teaching of teaching, including specific pedagogies, video libraries, and instructional materials and methods for teaching particular high-leverage practices or content knowledge for teaching
3. The development of teacher educators

EDUCATION

BY-NC-ND
This work is licensed under the Creative Commons Attribution-Noncommercial-No Derivative Works Version 3.0 United States License: http://creativecommons.org/licenses/by-nc-nd/3.0/us/

IT WON'T BE EASY.

1. The scale of the enterprise is vast and the U.S. has weak educational infrastructure.
2. It will take a movement to build a rigorous system of professional training for the responsibility of teaching our nation's youth, in order to achieve fairness in common access to skilled teaching.
3. It focuses on **teaching**, not **teachers.** It focuses on building capacity, not finding talent and firing.
4. It is not the "American way"—it is detailed (even prescriptive), not individually discretionary, common.
