

14th Annual Asian Business Conference Speakers

Technology Panel

Kevin Walsh

Vice-President, Internet Technology, Oracle

Kevin Walsh is Vice President of Internet Technology at Oracle Corporation. Mr. Walsh leads the development of Oracle's Internet infrastructure server strategy for Oracle's Asia Pacific division. Kevin is responsible for Oracle's Research and Development centers in China and acts a senior technology adviser to many US and Chinese organizations. His team is currently working closely with many entities in China to develop software platform infrastructures for key national impact projects there. Since joining Oracle in 1988, he has led the development of several leading edge business and technology strategies. While working at Oracle's development headquarters in Redwood Shores, California, he has spearheaded the development of many of Oracle's core technology infrastructure products including e-Commerce Infrastructure provisioning, Very Large Databases, Massively Parallel Processing (MPP) database systems, systems reliability architecture and the Oracle8i Internet Platform for Linux. He is also responsible for leading many of Oracle's development and alliances teams with Asian and European technology partners. During his tenure with Oracle he has been posted in Asia for several years and has previously led its systems support and technology marketing divisions from Oracle's Asia Pacific Headquarters in Singapore.

Prior to joining Oracle Mr. Walsh was an Information Systems Architect with McDermott International, where he was responsible for Oracle database systems in Asia, Europe, and the Middle East.

Mr. Walsh received his Master of Business Administration degree from the University of New Orleans at New Orleans, Louisiana.
