Patented, eh? What's the number? If you won't show the plans, the patent office will on request.

And imagine what happens when the airbag deploys!

[@vote4jeff](#) Well, if Amazon can sell the Desktop Steering Wheel, than anything is possible.

Also, I'm sure it's illegal to have a device that can play videos strapped to a steering wheel. He's definitely joking...

Thanks ass hat

TNTRedekopp 13 hours ago	The guy is NOT serious you morons. Can't you see the intended humour in this??? He even used the term "patented"duh....iRony
TNTRedekopp 13 hours ago	<p>HILARIOUS!!!! What a hoot!</p> <p>Take that Apple!</p> <p>I'd love to see some idiot get a ticket or better yet lose their license, for sticking their stooopid iPad to their steering wheel with two sided tape.</p> <p>HAHAHAAAAAA.....</p>
gr8fuljames 13 hours ago	Your a moron I hope YOUR family member dies due to someone with this thing.
HairyPotter2006 13 hours ago	Even radio is dangerous while you drive. An ambulance almost hit me two times in the past because I was unable to listen the siren, while listening to a radio. Today I don't have any radio in my cars. It is dangerous as hell.
yourmothersmells34 14 hours ago	idiotic... as if that's not distracting
giedosst 14 hours ago	<p>I wonder if this guy thought about what would happen if you get in a head on collision and the air bag opens or you bury your face in the ipad as a result of not paying attention to the road!</p> <p>Sheesh!</p>

jdmhaisai 22 hours ago	Joke or not, could you imagine if the airbag went off during an accident. Your death certificate would show cause of death as "250mph impact by iPad"
btnheazy03 1 day ago 2	what a great way to get yourself KILLED ON THE FUCKING FREEWAY.
metameme 1 day ago	what a fuckin moron

vosogo 1 day ago 4	Sir, I hope the lawsuits against you never end, and that your total lack of a sense of social responsibility eventually lands you in jail. You are a sick, disgusting example of everything that is wrong with capitalism.
jmcdeezi 1 day ago 3	you've GOT to be kidding, this fool is trying to kill us all.
ejicon 1 day ago 3	this is one of those parody videos created by "THE ONION" right? Because no one in their right mind would EVER do something this moronic. Closed Course? You on a neighborhood block with cars pulled in their drive-way. I can't wait for you to get sued. Gosh!!!
jtvjon 1 day ago	To the creator of this "invention" - Let's just say that you are careful enough not to cause an accident while using this (highly unlikely), what if someone hits you and then the airbag deploys...did you EVER put any thought into that? Didn't think so.
pummisher 1 day ago 2	I'm pretty sure this guy is kidding.
vote4jeff 1 day ago	@pummisher I don't think he is...
sf200425997 1 day ago	You are the biggest idiot I've seen in a long time. I believe it should be legal to shoot people that are willing to use this in the head. And then once more, just to make sure they don't kill anyone else.
SentrixxFI 1 day ago 2	You selling advertisement's should start with.... " Hey Stupid people with your bad driving while txtng and talking on your phone habits. Do we have the best deal of the lifetime for you! There really is no shortage of get rich quick morons out there like yourself. Good luck getting sued by the DOT dumb ass.

SSJIndy 1 day ago	Please design another mount for the lower half of the wheel - to give me a place to attach my iPhone and iPod. They keep falling out of the console when I turn, so having them right there where they won't flop around would be a huge improvement.

DickGranite 1 day ago	This is satire. It's a joke. How stupid are you people?
Uuttsjs 1 day ago	Yeah ..., shouldn't read while turning. Hopefully he will only kill himself.
XRunningtreeX 1 day ago	Lol texting while driving is much safer than this. With this big POS, you can't see the speedo/tach, and oh yeah, it's a big fucking screen obstructing your view lol
twoarmman 1 day ago	what a moroon. Not only is this freaking stupid because it's dangerous, it's also stupid because a cop could see this even if they were paying much attention. It's a perfect way to get pulled over by every cop who sees you. And the cop would probably be extra harsh just for being such an idiot.
davidxu1019 1 day ago	This idiot is a fucking tool
jex9 1 day ago	Makes me wonder how many people would buy this thing if it was for sale.
shibamidoh 1 day ago	reading will driving? isnt that the same as been on the phone talking ou texting? as a driver i dont like this idea, i dont want some macnerd crash into me and kill everyone inside... wrong , VERY WRONG (sorry man)
Dytiscidae 1 day ago	Funny thing is.. in a collision which would be nonlethal, this makes it so. If that airbag deploys that thing will shear the top of his head right off. Airbags inflate at roughly 200mph... yeah, good luck with that buddy. Not to mention this is probably the worst idea for an invention since.... wait, this may acctually be the worst ever.

- So you don't have to take your eyes off the wheel...
Umm I pay attention to the road. Patent process usually takes months unless he had an Ipad before release at best it's Patent Pending. He mentions having to take your attention off the wheel to adjust the radio... his radio controls are mounted on his steering wheel. Somebody is gonna lose their life to this outside that closed course that was what 50 feet? Not a proper test at all. No distraction except that novel / iTunes Library.
- [tbdeinc](#)
1 day ago
- ARE YOU FUCKING SERIOUS!!?
- This is just as bad as texting while driving.
- There is no way you can safely drive with such a large distraction in front of you.
- A CLOSED COARSE to demonstrate this... really... couldn't do it on a public crowded street where your attention is REQUIRED TO BE ON THE ROAD AND PEOPLE AROUND YOU!!!
- Please consider just how much you are going to contribute to vehicle accidents with this.

- [@DickGranite](#) Unfortunately, the average iPad user is pretty much a moron so even though this is satire, somebody watching this video will be next year's Darwin award winner. I just hope they don't take out an innocent bystander while they're eliminating themselves from the gene pool.

- "...ya really probably shouldn't be reading on a turn anyways."
- While it may be "much safer than other forms of in-car, uh, driver distraction", that doesn't change the fact that YOU SHOULDN'T BE TEXTING, PERUSING YOUR ITUNES LIBRARY OR READING ANYTHING WHILE DRIVING IN THE FIRST PLACE, YOU DUMB FUCK. I hope this is a joke, because anybody that seriously considers this a good idea should have their license revoked and destroyed by Steve Jobs himself (though I think there's an app for that).
- [NWGreenTeam](#)

- I AM SO GLAD TO FIND OUT THIS IS A JOKE!!!!
- Sadly enough it is not the first time someone has come

up with something as mind blowingly stupid as this, and actually sold it!

Please remember that the 2 ton steel cage that you "drive" is a killing machine when you do not take it seriously!!!! It is easy to see why Europeans say Americans can't drive, Euro cars don't even have cup holders to distract them, and I wouldn't either at 240km!

HAVE A GREAT DAY AND KEEP UP THE GOOD WORK!!!!

[zivan56](#)
2 days ago

A couple of points:
1. This is "illegal" in a number of places.
2. It is very distracting and significantly draws your attention away from the road
3. If your airbag deploys, you could have lots of shrapnel launched into your face/upper body
4. You cannot read and actively look at the road unless you can independently move each eye

Overall, a very bad idea. I see dozens of lawsuits due to accidents coming....

lol, this is actually a very well done joke, here is part of a testimonial from their web site.

"I have found that using cruise control and playing BeJeweled on my iPad mounted on the steering wheel keeps me awake and alert without distracting too much from driving. When there is no traffic on the really straight parts of the road, I can go through my inbox

and delete spam. I can't thank you enough.

lol, clearly a joke.

escaflowne2010
2 days ago

Right let me add how dangerous u are:

1) First you can't see the speedometer, so you probably end up killing someone.

2) If u hit something, the airbag will deploy and that combination of the ipad's metal and glass will most certainly break your head and/or make you blind.

Are you even a Dr?! waste of money "patent" for a clear lack of "SAFETY" understanding

ok I just read some of the comments and if this is a joke.....it's a very bad one. all it will do is give people ideas.

yes I do realize that if it is a joke it points out how crazy it is to have something like this mounted to your steering wheel.....but still I don't think it was funny either because now like I said, all it will do is give people ideas!

pageygeeza 2 days ago	<p>This has to be the best joke evvah!</p> <p>If I was driving with that piece of crap fixed to my steering wheel, It would take under 1 min of driving for me to launch it out my window.</p> <p>And yes after I crash which wouldn't take long being distracted by that monstrosity glaring at you. I would REALLY love to be slapped in the face at high speed with a massive piece of shrapnel (and trust me that's all this piece of crap is good for.)</p> <p>Useless inventor is fucking useless!</p>
wowcolors 2 days ago	<p>HAhahaha, it's pretty funny that most people do not realize this is a JOKE!</p>
Andrew0089 2 days ago	<p>i do not find this a smart idea, reading an article would keep your eyes off the road for seconds on end. thats enough time to swerve into the oncoming lane. then look up and smash head on into a car. This is just the same if not more distracting than texting. BAD IDEA</p>
eeraser1 2 days ago	<p>Oh yeah just what I want, an iPad shoved through my nose and embedded into the back of my skull. I swear to god, as soon as my airbag goes off and I get injured because the device interfered with my safety, I am going to sue him for so much money I am going to own his youTube channel.</p> <p>Talk about stupid products, The only better would have been the Shamwow guy selling these plans...</p>

"you shouldn't be reading in a turn anyway".</p> <p>tell you what mate: you are not supposed to be reading in traffic, period. You're supposed to watch the road and PAY ATTENTION!</p>
almitydave 2 days ago	<p>This is a terrible, terrible, TERRIBLE idea! You cannot pay attention to driving and reading the newspaper (example in the video) at the same time. In addition to the eyes-off-the-road distraction, it's in the way of the airbag (as others point out), and it also obstructs your grip on the steering wheel. I don't think use of cell phones while driving should be illegal per se, but there oughtta be a law against THIS.</p>
seabass187er 2 days ago	<p>I see so many problems with this, but mainly what about when you rear end someone, which you will, won't the airbag shoot this thing into your face? Idiot invention for idiots. Sorry dude.</p>

All it needs is a giant black hood like an old-time camera to keep the glare off the screen and the distracting sight of other cars, pedestrians, livestock, and trees flying by, over, and through the windshield. My favourite part is where the airbag deploys, forcing the iPad through his slack, drooling jaw and lodging it in his brain pan.

This product is completly unsafe. Im not sure who told you it was 'safe' but you should really stop selling them now.

Creating more distracted drivers - You can claim they wont be distracted, but if there is something engaging on the device, you logic fails.

In case of an accident, you now have the potential of the airbag deploying an ipad into their face. I could go on, but you should really examine your clear attempt at a money grab and at least put some effort into safety.

[MartinIturbide](#)

u invented something that will get a person in an accident.

DarkEgg11 3 weeks ago	what about airbags? this is illegal right?
muggz82 3 weeks ago	This is gotta be the most pointless and a dangerous gadget.. What happens when you have an accident and airbag go off .. you have iPad in your face! You cant even see the speedo or anything on the dash.. how can this be a seller!?
	CCcccrazzzyyy yanks!
kassdog 3 weeks ago	Are you kidding me. "shouldn't be reading while turning" but ok to read while going straight. You sir are insane and cant wait to see the first accident caused by this product.
kassdog 3 weeks ago	@kassdog actually can't wait for the first accident with an airbag going off. You are nuts to actually sell this.
f1fanatic0582 3 weeks ago	what is this made from? suction cups and zip ties?
wcr4 3 weeks ago	@csev Way to fish out hypocrisy to formulate an argument.
laura0181 3 weeks ago	"What happens when the airbag deploys and you get an iPad to the face!" HAHAHA!
f1fanatic0582 3 weeks ago	what happens when the airbag deploys and you get an iPad to the face! stupid product don't waste your time or money!
hansmasing 4 weeks ago	Sometimes parody can be a little too subtle, Chuck.
goatcaca 1 month ago	This is a terrible idea. A driver should drive and nothing else. And doesn't the iPad obstruct the steering wheel? This is just as bad, if not worse than talking on a cell phone which is being banned throughout the country. And texting while driving? I won't even start.
clint0ve 1 month ago	Drive safely!! Dr. Chuck. lol

maurercw 1 month ago	What happens when your air bag deploys?
csev 1 month ago	@maurercw I think that the right thing to do for the airbag might be some sort of hinge.
coo446 3 weeks ago	@csev ur gonna kill lots of people who get in little accidents by getting hit in the face with the ipad bad product please dont sell it ull regret ur gonna be sued lots of money ur screwed
darkmrcuise 3 weeks ago	@csev and how exactly do you see your speed when you hav an ipad in the way?
ThePhotografer 2 weeks ago	@csev airbags deploy fast enough to shear your fingers off (or so I've heard), if for some reason they were directly in front of the airbag... the wheel mount kinda defeats the purpose of an airbag (the hinge will just break), misewell have a really strong friend slam the iPad into your face. may I suggest living without an iPad for 10-30mins?

1 month ago This is insane! I sincerely hope you put some more thought into this product. The priority for any in-vehicle electronic device should be to help the driver drive the vehicle.
