

## Accessing ICG's on the CAEN Network

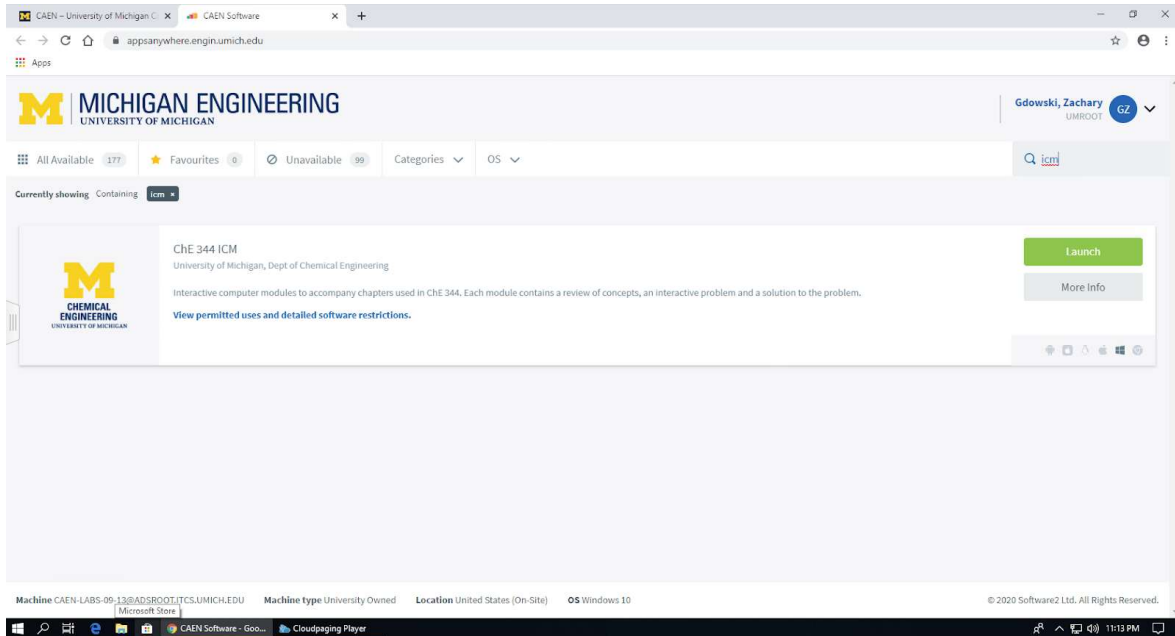

When successfully logged in as a student on the Windows CAEN environment, all ICG's are available through the AppsAnywhere software.

### Installation Procedure

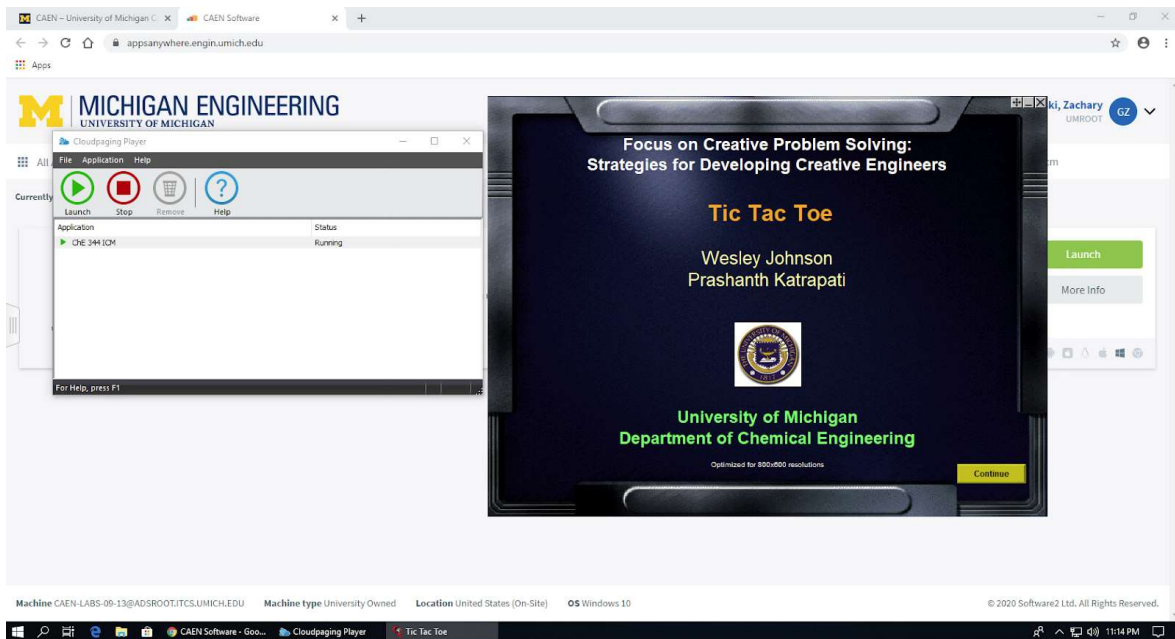

Step 1: On a CAEN network computer (on campus or via VPN), open the AppsAnywhere extension on Google Chrome.

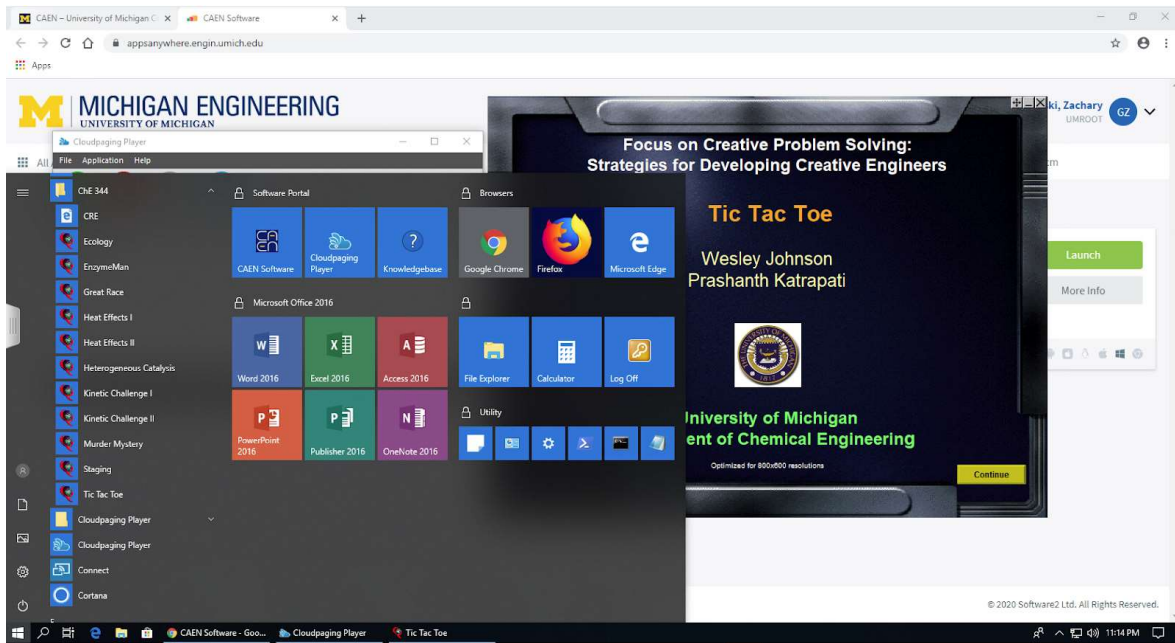

Step 2: search "ICM" on AppsAnywhere, and select "ChE 344 ICM".

Step 3: Open ChE 344 ICM, this will open the game "Tic tac toe".

Step 4: Once "Tic tac toe" is open, navigate to the Windows start menu (Windows icon in the bottom left corner).

Step 5: In the index, under ChE 344 ICM, the rest of the modules will appear and students can open whichever one they choose.

Note: finding the other modules in the start menu is only possible once the app is fully loaded in step 2.
