

Ticket To Ride ~ Long Routes Variant by Greg Nichols (a2greg)

This T2R variant attempts to balance long route distribution and takes its' inspiration from T2R:Europe. In the pre-game setup, remove all original destination tickets with values of 4, 20, 21, and 22. The remaining 25 tickets become the "ticket" deck. Take the 8 long route variant tickets and shuffle them face down. For 2 and 3 player games, deal two long route tickets face down to each player. For 4 and 5 player games, deal one long route ticket face down to each player. Place any remaining long route tickets back in the game box without letting anyone see them. Players cannot discard long route tickets. Then deal 3 tickets from the ticket deck to each player. Players are allowed to keep 2 of these 3 tickets. Discarded tickets go to the bottom of the ticket deck. The rest of the game is played as per the regular rules. Enjoy!

(Print page 1 on card stock; back print page 1 with page 2 if desired; then cut out the 8 variant tickets)
