Compressed Mortality, 1999-2004 Request

The Compressed Mortality database contains mortality and population counts for all U.S. counties. Counts and rates of death can be obtained by cause of death, state, county, age, race, sex, and year. [More information](#)[Quick Start Guide](#)

Note: This screen allows you to request data for the years 1999 - 2004 only, with the underlying cause of death specified with ICD-10 codes. To request data for preceding years, see [Mortality for 1979 - 1998 with ICD 9 codes](#). For more information, refer to [Why Two Query Pages?](#)

Make all desired selections and then click any **Send** button one time to send your request.

1. Organize and label results: ?

Group Results By

And By

And By

And By

And By

Title

2. Select location and time: ?

Click a round button to choose location

Choose FIPS code for state using FINDER

[Year](#)

[States](#) [States](#) Click to look up values.

[Regions](#)

Notes:

- Leave the box empty to include all values.
- You may also enter values by hand, one code per line. Use the Finder to see the correct code format. For example, 02 is the Alaska state code.

3. Select demographics:

Click the button to choose desired Ages.
