

Page 355: the expression currently reads:

$$\text{prob} \{ \hat{p} - \sigma_p z_{2.5\%} < p < \hat{p} + \sigma_p z_{97.5\%} \}$$

There are many ways to write this out correctly, but this is not one of them. What we meant to write was either:

$$\text{prob} \{ \hat{p} + \sigma_p z_{2.5\%} < p < \hat{p} + \sigma_p z_{97.5\%} \}$$

or

$$\text{prob} \{ \hat{p} - \sigma_p z_{97.5\%} < p < \hat{p} + \sigma_p z_{97.5\%} \}$$
