

CONTENTS

| | |
|--|------------|
| Preface | xii |
| 1 Sound | 1 |
| 1.1 Air | 1 |
| 1.2 Pressure waves | 2 |
| 1.2.1 Sound pressure | 4 |
| 1.3 Sound production | 4 |
| 1.4 Mathematics of sound waves | 6 |
| 1.5 Waveforms | 8 |
| 1.5.1 Waveforms of musical sounds | 9 |
| 1.5.2 Characteristics of waveforms | 10 |
| 1.6 Advanced The wave equation | 11 |
| 1.6.1 Advanced Pressure, velocity, and acoustic impedance | 13 |
| 2 Frequency and pitch | 17 |
| 2.1 Periodic waveforms and frequency | 17 |
| 2.1.1 Wavelength | 20 |
| 2.1.2 Pitch | 21 |
| 2.2 Intervals and scales | 23 |
| 2.2.1 Frequencies and intervals | 24 |
| 2.2.2 The major scale | 26 |
| 2.2.3 Problems with the major scale | 27 |
| 2.3 Equal temperament tuning | 28 |
| 2.3.1 The equal temperament major scale | 29 |
| 2.3.2 The 12-tone scale | 30 |
| 2.4 Frequencies of notes | 32 |
| 2.4.1 Musical cents | 35 |
| 2.4.2 Comparison between just intonation and equal temperament | 37 |
| 2.4.3 Advanced Equal temperament and rational approximation | 38 |
| 2.4.4 Meantone temperament | 41 |
| 2.4.5 Concert pitch and the frequency of A4 | 43 |

CONTENTS

| | | |
|----------|---|-----------|
| 2.5 | Musical notation | 44 |
| 2.5.1 | The staff and notes | 45 |
| 2.5.2 | Scales | 47 |
| 2.5.3 | Note duration | 48 |
| 3 | Amplitude and loudness | 54 |
| 3.1 | The energy of a sound wave | 55 |
| 3.1.1 | Intensity | 55 |
| 3.1.2 | Intensity and sound pressure | 56 |
| 3.1.3 | Instantaneous intensity and average intensity | 57 |
| 3.1.4 | Typical intensity values | 59 |
| 3.2 | Sound intensity level | 59 |
| 3.2.1 | The decibel scale | 61 |
| 3.2.2 | Sound pressure level | 63 |
| 3.2.3 | Energy density | 64 |
| 3.3 | Obstruction of sound by obstacles | 67 |
| 3.4 | Combining intensities | 70 |
| 3.5 | Variation of intensity with distance | 71 |
| 3.6 | Apparent loudness | 74 |
| 3.6.1 | Variation of apparent loudness with frequency | 76 |
| 3.6.2 | The apparent loudness scale | 79 |
| 3.6.3 | Apparent loudness in music | 80 |
| 3.7 | Measuring loudness | 82 |
| 4 | Waveform and timbre | 89 |
| 4.1 | Timbre | 89 |
| 4.2 | Combinations of sounds | 90 |
| 4.3 | Harmonic analysis | 93 |
| 4.3.1 | Sine waves | 94 |
| 4.3.2 | Adding sine waves | 94 |
| 4.3.3 | Harmonics | 98 |
| 4.3.4 | The harmonic series | 101 |
| 4.3.5 | The amount of each harmonic in a sound | 102 |
| 4.3.6 | Harmonic analysis of instrumental sounds | 104 |
| 4.3.7 | The frequency spectrum | 106 |
| 4.3.8 | Advanced Fourier's formula | 108 |
| 4.3.9 | Waveforms with no fundamental | 109 |
| 4.4 | Non-periodic waveforms | 111 |
| 4.4.1 | Noise | 113 |
| 4.5 | Phase | 114 |

| | |
|--|------------|
| 5 Human hearing and the ear | 122 |
| 5.1 Range of hearing | 122 |
| 5.2 The ear | 125 |
| 5.2.1 The outer ear | 125 |
| 5.2.2 The middle ear | 126 |
| 5.2.3 The inner ear | 128 |
| 5.3 The basilar membrane and pitch perception | 128 |
| 5.3.1 Resonance | 129 |
| 5.3.2 Bandwidth of the basilar membrane | 132 |
| 5.3.3 Timing of nerve signals | 135 |
| 5.3.4 How we perceive pitch | 136 |
| 5.4 Dissonance and harmony | 138 |
| 5.4.1 Auditory roughness | 138 |
| 5.4.2 Beats | 139 |
| 5.4.3 Harmonics and dissonance | 143 |
| 5.4.4 Variation of the critical bandwidth | 147 |
| 5.4.5 Advanced Calculation of dissonance | 148 |
| 5.5 Perceiving the direction of sound | 149 |
| 5.5.1 Differences in loudness | 150 |
| 5.5.2 Differences in timing | 150 |
| 5.5.3 Front-back ambiguity | 154 |
| 6 Room acoustics | 157 |
| 6.1 Reflection and absorption of sound | 158 |
| 6.1.1 Absorption coefficient | 159 |
| 6.1.2 Advanced The impedance tube | 162 |
| 6.1.3 Advanced Theoretical calculation of absorption | 163 |
| 6.1.4 Diffusion and transmission | 164 |
| 6.2 Reverberation | 165 |
| 6.2.1 Reverberation time | 166 |
| 6.2.2 Sabine's equation for reverberation time | 169 |
| 6.2.3 Advanced Derivation of Sabine's equation | 172 |
| 6.2.4 Reducing reverberation | 174 |
| 6.2.5 Acoustic effect of the audience | 176 |
| 6.2.6 Typical reverberation times | 176 |
| 6.2.7 Reverb times of real music venues | 177 |
| 6.2.8 Measuring absorption using reverb | 178 |
| 6.3 Loudness of reverberation | 181 |
| 6.3.1 Direct sound versus reverberation | 182 |
| 6.3.2 Advanced Energy density in a reverberant room | 185 |
| 6.3.3 Strength factor | 187 |

CONTENTS

| | | |
|----------|---|------------|
| 6.3.4 | Directivity | 189 |
| 6.3.5 | Typical strength factors | 190 |
| 6.4 | Variation of reverb with frequency | 191 |
| 6.5 | Designing for reverberation | 193 |
| 6.5.1 | Concert halls and unamplified music | 194 |
| 6.5.2 | Amplified music | 197 |
| 6.6 | Early reflections and reverb density | 199 |
| 6.6.1 | Early reflections | 199 |
| 6.6.2 | Timing of the first reflection | 201 |
| 6.6.3 | Reducing the first reflection time | 203 |
| 6.6.4 | Late reverberation and reverb density | 204 |
| 6.7 | Subjective qualities of good acoustics | 205 |
| 6.8 | Reverb in recorded music | 208 |
| 7 | Sound recording and reproduction | 214 |
| 7.1 | Electricity and sound | 215 |
| 7.1.1 | Sound as an electrical waveform | 216 |
| 7.2 | Electrical circuits | 217 |
| 7.2.1 | Resistors | 217 |
| 7.2.2 | The potential divider or volume control | 218 |
| 7.2.3 | Capacitors | 220 |
| 7.2.4 | Filters | 223 |
| 7.2.5 | Advanced Frequency response of filters | 230 |
| 7.2.6 | Transistors | 232 |
| 7.2.7 | Electromagnets and induction | 233 |
| 7.3 | Microphones | 235 |
| 7.3.1 | Pressure microphones | 236 |
| 7.3.2 | Pressure-gradient microphones | 238 |
| 7.3.3 | Directional response | 241 |
| 7.3.4 | Frequency response | 242 |
| 7.3.5 | Condenser microphones | 245 |
| 7.3.6 | Dynamic microphones | 249 |
| 7.3.7 | Advanced Mechanics of microphones | 250 |
| 7.3.8 | Other types of microphone | 252 |
| 7.4 | Recording | 253 |
| 7.4.1 | Magnetic tape | 254 |
| 7.4.2 | Vinyl records | 255 |
| 7.5 | Loudspeakers | 259 |
| 7.5.1 | Dynamic loudspeakers | 259 |
| 7.5.2 | Sound production | 260 |
| 7.5.3 | Frequency response | 261 |

| | | |
|-----------|---|------------|
| 7.5.4 | Advanced Movement of a speaker cone | 263 |
| 7.5.5 | Enclosures | 264 |
| 7.5.6 | Directionality | 265 |
| 7.5.7 | Design of loudspeaker systems | 268 |
| 7.5.8 | Advanced Directionality of a circular speaker | 270 |
| 7.5.9 | Phased arrays | 272 |
| 7.6 | Stereo recording and surround sound | 272 |
| 8 | Digital audio | 281 |
| 8.1 | Converting sound into numbers | 281 |
| 8.1.1 | Sampling | 283 |
| 8.1.2 | Choice of sampling frequency | 285 |
| 8.1.3 | Advanced The Nyquist sampling theorem | 287 |
| 8.1.4 | Advanced Reconstructing the waveform | 288 |
| 8.1.5 | Resolution | 291 |
| 8.2 | Digital recording | 295 |
| 8.2.1 | Direct-to-disk recording | 296 |
| 8.2.2 | Editing | 297 |
| 8.2.3 | Equalization and effects | 298 |
| 8.2.4 | Mixing | 300 |
| 8.2.5 | Mastering | 302 |
| 8.3 | Data compression | 302 |
| 8.3.1 | Compression algorithms | 304 |
| 8.3.2 | Practical considerations | 309 |
| 8.3.3 | Sound quality of compressed audio | 312 |
| 8.4 | Digital sound versus vinyl | 314 |
| 9 | Acoustic musical instruments | 320 |
| 9.1 | Vibration and sound production | 320 |
| 9.1.1 | The mathematics of vibration | 321 |
| 9.1.2 | Advanced Simple harmonic motion | 323 |
| 9.2 | Vibrating strings | 324 |
| 9.2.1 | Mersenne's law | 326 |
| 9.2.2 | Turning vibration into sound | 328 |
| 9.2.3 | Advanced Equation of motion for a stretched string | 330 |
| 9.2.4 | Advanced Solution of the equation | 331 |
| 9.3 | Other sources of vibration | 332 |
| 10 | String instruments | 337 |
| 10.1 | Vibrations and modes | 337 |
| 10.1.1 | Timbre | 340 |

CONTENTS

| | | |
|---------|---|-----|
| 10.1.2 | Advanced Solutions of the wave equation | 342 |
| 10.2 | Plucked strings | 343 |
| 10.2.1 | Advanced Harmonics of a plucked string | 347 |
| 10.3 | Producing different pitches | 348 |
| 10.3.1 | Notes from different strings | 349 |
| 10.3.2 | Different notes from the same string | 350 |
| 10.3.3 | Twang and string bending | 351 |
| 10.3.4 | Advanced Equations for string bending | 354 |
| 10.4 | The soundboard and resonance | 355 |
| 10.4.1 | Choice of material for the soundboard | 356 |
| 10.4.2 | Resonance of the soundboard | 358 |
| 10.4.3 | Resonance of air inside the body | 360 |
| 10.4.4 | Overall sound output | 361 |
| 10.5 | Decay of the note | 363 |
| 10.5.1 | Advanced Energy loss through the bridge | 366 |
| 10.5.2 | Decay of harmonics | 368 |
| 10.5.3 | Non-exponential decay | 368 |
| 10.6 | Examples of plucked instruments | 370 |
| 10.7 | Struck strings and the piano | 373 |
| 10.7.1 | Advanced The modern piano action | 376 |
| 10.7.2 | Vibration of the string | 377 |
| 10.7.3 | Striking the string | 379 |
| 10.7.4 | Advanced Harmonics of a struck string | 382 |
| 10.7.5 | String length, diameter, and tension | 383 |
| 10.7.6 | Inharmonicity and stretched tuning | 386 |
| 10.7.7 | The piano soundboard | 388 |
| 10.7.8 | Decay of the note | 391 |
| 10.7.9 | Evolution of the grand piano | 392 |
| 10.7.10 | The upright piano | 394 |
| 10.8 | Bowed strings and the violin | 396 |
| 10.8.1 | The violin bow | 397 |
| 10.8.2 | The Helmholtz motion | 399 |
| 10.8.3 | Advanced Velocity along a stretched string | 402 |
| 10.8.4 | Advanced Mathematical form of the Helmholtz motion | 403 |
| 10.8.5 | Advanced Amplitude of vibration | 404 |
| 10.8.6 | Timbre of a bowed string | 404 |
| 10.8.7 | The soundboard and resonances | 405 |
| 10.8.8 | Good violins and poor violins | 408 |
| 10.8.9 | Viola, cello, and double bass | 410 |
| 10.8.10 | Other bowed instruments | 415 |

| | |
|--|------------|
| 11 Wind and brass instruments | 422 |
| 11.1 Vibration of air in a pipe | 422 |
| 11.1.1 Open pipes | 426 |
| 11.1.2 Modes of vibration | 429 |
| 11.1.3 Tuning and temperature | 432 |
| 11.1.4 Pipes closed at one end | 434 |
| 11.1.5 Advanced Standing waves in an open pipe | 439 |
| 11.1.6 Advanced Air velocity | 440 |
| 11.1.7 Advanced Standing waves in a pipe closed at one end | 440 |
| 11.1.8 Non-cylindrical pipes | 441 |
| 11.1.9 Advanced Vibration of air in a non-cylindrical pipe | 444 |
| 11.2 Flutes | 445 |
| 11.2.1 The jet-drive mechanism | 447 |
| 11.2.2 Advanced Bernoulli's equation | 453 |
| 11.2.3 The pipe organ | 453 |
| 11.2.4 Advanced Harmonics of flutes and organs | 458 |
| 11.2.5 Overblowing | 461 |
| 11.2.6 Register holes | 463 |
| 11.2.7 Tone holes | 465 |
| 11.2.8 The recorder | 466 |
| 11.2.9 The concert flute | 468 |
| 11.3 Reed instruments | 471 |
| 11.3.1 Advanced Airflow past a reed | 475 |
| 11.3.2 The clarinet | 477 |
| 11.3.3 The saxophone | 479 |
| 11.3.4 Double reeds and the oboe | 481 |
| 11.3.5 Other reed instruments | 483 |
| 11.4 Brass instruments | 485 |
| 11.4.1 Vibration modes of a brass instrument | 485 |
| 11.4.2 Sound production | 488 |
| 11.4.3 Playing different notes | 491 |
| 11.4.4 The slide trombone | 491 |
| 11.4.5 The trumpet | 495 |
| 11.4.6 Tuning on the trumpet | 498 |
| 11.4.7 Advanced Crook lengths on the trumpet | 502 |
| 11.4.8 Other brass instruments | 503 |
| 11.5 Hard reed instruments | 505 |
| 12 The voice | 510 |
| 12.1 The vocal apparatus | 510 |
| 12.1.1 The vocal cords | 512 |

CONTENTS

| | | |
|-----------|---|------------|
| 12.1.2 | Sound production | 514 |
| 12.2 | Sound shaping and phonemes | 515 |
| 12.2.1 | Vowels and formants | 517 |
| 12.2.2 | Advanced Broadening of resonances | 523 |
| 12.2.3 | Consonants | 525 |
| 12.3 | Vocal effects | 526 |
| 12.3.1 | Vibrato | 527 |
| 12.3.2 | Falsetto | 528 |
| 13 | Percussion instruments | 532 |
| 13.1 | Xylophone and marimba | 533 |
| 13.1.1 | Advanced Equation of motion for a vibrating bar | 538 |
| 13.1.2 | Advanced Solutions of the equation | 540 |
| 13.1.3 | Striking position | 542 |
| 13.1.4 | Resonator tubes | 542 |
| 13.1.5 | Composition of the bars | 544 |
| 13.2 | Glockenspiel and vibraphone | 545 |
| 13.3 | Chimes and triangle | 549 |
| 13.4 | Bells | 551 |
| 13.4.1 | Ringing changes | 555 |
| 13.4.2 | Carillons | 557 |
| 13.4.3 | Handbells | 558 |
| 13.5 | Steelpan | 558 |
| 13.6 | Drums | 561 |
| 13.6.1 | Vibration of a drum head | 563 |
| 13.6.2 | Strength of overtones | 568 |
| 13.6.3 | Advanced Equation of motion for a drum head | 569 |
| 13.6.4 | Advanced Vibration of a square drum head | 570 |
| 13.6.5 | Advanced Vibration of a circular drum head | 572 |
| 13.6.6 | Advanced Can one hear the shape of a drum? | 574 |
| 13.6.7 | Air loading | 574 |
| 13.6.8 | The drum body | 575 |
| 13.6.9 | Sound output | 578 |
| 13.7 | Cymbals | 579 |
| 13.8 | Other percussion instruments | 581 |
| 14 | Electric instruments and the electric guitar | 586 |
| 14.1 | Electric guitar | 587 |
| 14.1.1 | History and design of the electric guitar | 587 |
| 14.1.2 | Impedance and sustain | 588 |
| 14.1.3 | Pickups | 589 |

| | | |
|----------------------|---|------------|
| 14.2 | The guitar amplifier and distortion | 593 |
| 14.2.1 | Harmonic distortion | 596 |
| 14.2.2 | Intermodulation distortion | 599 |
| 14.2.3 | Advanced Nonlinear amplifiers | 602 |
| 14.2.4 | Feedback | 604 |
| 14.2.5 | Guitar effects | 605 |
| 14.3 | Electric bass | 605 |
| 14.4 | Electric violin | 607 |
| 14.5 | Electric piano | 611 |
| 14.5.1 | Electric grand piano | 611 |
| 14.5.2 | Rhodes electric piano | 613 |
| 14.5.3 | Wurlitzer electric piano | 618 |
| 14.5.4 | Advanced Vibration modes of Rhodes and Wurlitzer pianos | 620 |
| 14.6 | Clavinet | 622 |
| 14.7 | Hammond organ | 624 |
| 14.7.1 | Tonewheels | 625 |
| 14.7.2 | Combinations of tones | 628 |
| 14.7.3 | Advanced Pitches on the Hammond organ | 632 |
| 14.7.4 | The Leslie cabinet | 634 |
| 14.7.5 | Vibrato and the Doppler effect | 635 |
| 14.7.6 | The Hammond/Leslie sound | 640 |
| 15 | Electronic instruments and synthesizers | 645 |
| 15.1 | Early electronic instruments | 646 |
| 15.2 | Analog synthesizers | 649 |
| 15.2.1 | Sound shaping | 652 |
| 15.2.2 | Filter envelopes | 655 |
| 15.2.3 | Synthesizer architecture and controls | 655 |
| 15.3 | FM synthesizers | 657 |
| 15.3.1 | Advanced The mathematics of FM synthesis | 665 |
| 15.4 | Sample players | 667 |
| 15.4.1 | Loops, layers, and zones | 669 |
| 15.5 | Physical modeling synthesizers | 674 |
| 15.5.1 | D'Alembert's solution for a vibrating string | 675 |
| 15.5.2 | The Karplus-Strong algorithm | 678 |
