What You'll Do

- **Hone your strategic abilities and develop in-depth understanding of the pharma, biotech, and med tech industries**
- **In a typical project:**
 - Work closely with team members to solve complex problems by applying a hypothesis-driven methodology
 - Conduct interviews and research to drive to critical insights
 - Create and utilize analytical tools such as forecast models
 - Communicate recommendations to clients to inform strategic decision-making

How You'll Grow

- **Transition into consulting and rapidly cultivate your skills through our best-in-class training and mentorship:**
 - Two-week training for new consultants that includes an abbreviated project experience
 - Personalized feedback sessions with managers and leadership following each project
 - Individual mentorship from a member of leadership who tracks your long-term professional development
 - Ongoing training to ensure continued success

Where You'll Go

- **Advance rapidly within ClearView's meritocracy:**
 - Promotions based on individual development, without a rigid timeline
- **Launch a subsequent career in:**
 - Business development, new product planning, or marketing at mid-size or large pharmaceutical companies
 - Commercial, strategic, or portfolio management at life sciences start-ups or biotech firms
 - Venture capital or private equity in the life sciences
