

WG n summary

- Light mediator NSI: competitive with other experiments
de Gouvea, Machado, Necib, Ridgeway, Zhang
- Neutrino magnetic moment: comparable with GEMMA
see Janet and Thomas
- Upscattering to heavy state (Gninenko-like): possible
bound on MeV sterile neutrinos
Arguelles, de Gouvea, Li, Machado see also Ross-Lonergan
- IsoDAR @ Compact detectors: coherent ν -N scattering
Arguelles, de Gouvea, Li, Machado
