Impacts of Gene Essentiality, Expression Pattern, and Gene Compactness on the Evolutionary Rate of Mammalian Proteins

Ben-Yang Liao, Nicole M. Scott and Jianzhi Zhang

Mol. Biol. Evol. 23:2072–2080. 2006

A bug in the authors' computer program caused a number of errors during the compilation of the lists of mouse essential genes and nonessential genes. The bug has been fixed and all the analyses have been repeated based on an updated mouse genome annotation (Ensembl v38 and MGI 3.51). Fortunately, all previous results remain qualitatively unchanged. The corrected lists of essential and nonessential genes as well as the new results can be found at the authors' website (<http://www.umich.edu/~zhanglab/download.htm>). The authors regret this error.
